OBJECTIVE

Highly motivated Computer Science student skilled in software development, data structures, algorithms and AI-web technologies, seeking to contribute technical expertise and creativity to innovative real-world projects.

EDUCATION

B.Tech in Computer Science, Bharath Institute of Higher Education and Research, Chennai **Expected 2026**
CGPA: 8.1/10 TN, India

JEE Mains (Engineering Entrance Exam), National Testing Agency (NTA) **2022**
Scored **88.04 percentile** (All India Rank: 15411/1.2M) AP, India

Class 12 (MPC) (CBSE), VIVA the School by VVIT **2020 – 2022**
percentage: **78.8 percentage** AP, India

10th Grade (SSC), VIDYAVIKAS **2018 – 2019**
GPA: 10/10 AP, India

SKILLS

Programming Languages	C, Python, JavaScript(ES6+), HTML, CSS3
Frameworks/ Libraries	Pygame, React.js, Tailwind, FramerMotion
Databases	MySQL, PostgreSQL
AI integrations	shadcn ui, Clerk(Auth), Supabase, convex
Academic Coursework	Data Structures and algorithms, Operating Systems, CN, OOP, DBMS, Maths
Developer Tools	GitHub, VS Code, Cursor
Certifications	Problem Solving in Python, Web development using Javascript, searching and sorting (CodeChef) Big Data Computing(NPTEL) , Efficient Communication, English for IT (Cisco) (View)

PROJECTS

Creatr (AI-CMS platform): Full-stack web application built with Next.js 15, React 19, and Convex database for AI-powered content creation. Features Google Gemini AI integration for automated blog writing, ImageKit media management, Clerk authentication, and real-time analytics. Includes social features (likes, comments, follows), content scheduling, and comprehensive creator dashboard with daily view tracking. Built with modern stack including Tailwind CSS, Shadcn UI, and TypeScript for scalable creator economy solution.([Project Link](#))

CareerFlow - Full-Stack Job Board Platform: CareerFlow is a full-stack job platform enabling candidates to discover and apply to roles and recruiters to post and manage jobs, with Google/Facebook OAuth and email/password authentication, role-based access, and real-time data sync via Convex. I implemented end-to-end flows including onboarding, saved jobs, applications, candidate management, notifications, and resume handling, with a responsive, modern UI built in React (Vite) and Tailwind. Performance and UX were optimized through lazy/deferred routing, virtualized lists, request caching/deduping hooks, and a production-only service worker strategy. The stack includes React Router, @react-oauth/google, Convex functions (queries/mutations), and local storage for session handling. ([Project Link](#))

FoodieHub - Food Delivery Web App: Built sophisticated food delivery app with real-time cart management, intelligent search, UPI checkout, order tracking, and persistent authentication using React 18, TypeScript, and Tailwind CSS. ([Project Link](#))

EXTRA-CURRICULAR ACTIVITIES

- **CodeChef Profile**: Solved 2700+ problems, maintained a 250+ day coding streak, and earned multiple certifications in programming. ([Profile Link](#))
