SUMMARY

Full-stack engineer building multi-tenant SaaS platforms with NestJS, Next.js, and PostgreSQL. Skilled in REST API design, authentication (Keycloak, JWT, OAuth 2.0), database schema modeling, and performance optimization. On past projects, reduced application load times from 15+ seconds to under 6 using caching, query optimization, and request batching. CodeChef 3-star coder with 1600+ problems solved.

EDUCATION

B.Tech in Computer Science

Bharath Institute of Higher Education and Research, Chennai

CGPA: 8.1/10

Expected 2026

TN, India

SKILLS

Programming Languages	TypeScript, JavaScript (ES6+), Python, SQL
Frontend Technologies	Next.js, React.js, Module Federation, Tailwind CSS, shadcn/ui, Zustand
Backend Technologies	NestJS, Node.js, Express.js, REST APIs, Drizzle, Prisma, BullMQ
Databases	PostgreSQL, MySQL, Convex
Authentication & Cloud	Keycloak, JWT, OAuth 2.0, Clerk, Supabase, AWS S3
Developer Tools	Docker, Webpack, Git, GitHub, Vercel, Activepieces
Computer Science	Data Structures and Algorithms, Object-Oriented Programming, Operating Systems

EXPERIENCE

Trainee Software Engineer — Five Data Products and Solutions Pvt. Ltd. Feb 2026 – Present

- Build a multi-tenant NestJS backend (25+ modules) on PostgreSQL/Drizzle, with BullMQ + Redis background jobs and S3 file uploads via AWS SDK v3.
- Maintain a Webpack Module Federation architecture where the host app loads a federated dashboard remote.
- Integrated Keycloak SSO with oidc-client + PKCE on Next.js and server-side JWT verification on NestJS.

Full Stack Web Developer Intern — Solar Secure Solutions (MSME – Govt. of India) Feb 2025 – Mar 2025

- Built backend APIs and frontend flows; handled authentication, validation, and client-server data exchange.
- Designed RESTful endpoints and integrated them with frontend for reliable request and response handling.

PROJECTS

CareerFlow — Serverless ATS-Lite Job Recruitment Platform [\(Link\)](#)

- Built a full-stack ATS-lite platform with candidate and recruiter workflows, Google/Facebook OAuth, resume uploads, notifications, and real-time application tracking powered by Convex reactive queries.
- Improved frontend performance with lazy loading, virtualized lists, request deduplication, optimistic UI updates, and PWA caching for offline-capable browsing.

Cosypos — Restaurant Point of Sale System [\(Link\)](#)

- Built a full-stack restaurant POS with real-time order tracking, inventory management, reservations, staff attendance, and JWT 3-tier role-based access (Admin, Staff, User).
- Reduced application load time from 15–20s to under 6s through query optimization, strategic database indexing, connection pooling, and ETag-based HTTP caching across 11 Prisma models.

ACHIEVEMENTS

CodeChef: 3-star competitive programmer, 1600+ problems solved, 400+ day coding streak ([brainstorm_69](#)).

JEE Mains 2022: 88.04 percentile, All India Rank 15411 / 1.2M candidates.
